

THE FUTURE OF ADULT CONTENT

# Non-Fungible Titties.

WHITEPAPER

**NFTITTIES**

# 1. Introduction

NFTitties is a revolutionary auction-based adult NFT marketplace, forged to build stronger connections between creators and their fans through the Ethereum blockchain. We are defining a new standard for content creators by building a mutually-beneficial support bridge between content creators and their fans. Prepare for an exciting new age of the Internet.

Non-fungible tokens (NFTs) are unique, non-interchangeable and non-hackable digital tokens powered by public blockchains and represent digital files, in this case images and videos created by our verified content creators. We enable creators to upload their content as an NFT and sell it for Ethereum through an auction-based process, allowing their fans or other interested parties to "collect" and own a piece of their content on the blockchain.

Our goal is to lead the global adoption of adult NFT content through innovative technology and the financial control that crypto provides. We are bringing crypto lovers, adult content creators and collectors all under one welcoming roof.

# 2. Features

## 2.1 What Makes Us Different

NFTitties chooses quality over quantity. For this reason, all NFTs are hand-checked by our QA team to prevent oversaturating our marketplace and list only the highest quality NFTs.

We're not just focusing our attention on NFTs. In December, we will be adding subscriptions to our platform, shortly followed by chat sessions. This will greatly expand our market and provide our creators with a more stable way to make money on NFTitties.

## 2.2 The Independent OnlyFans for Crypto

Ever since traditional banks forced OnlyFans into their recently announced porn-ban, adult content creators were shocked. Even though OnlyFans has now caved to peer pressure and is allowing plain nudes again, they're still kicking a giant portion of the market to the curb definitively.

It is time for creators to take back control. Due to the nature of cryptocurrencies, you are your own bank and **you are in control**. Chargebacks are impossible in crypto, so once a payment is made, there's no way to revert it. This is what makes crypto and NFTitties an ideal solution for adult content creators.

## 2.3 Power to the Creators

If you're interested in being a creator, simply create an account, set up your profile and get verified. Once you're verified, you can create your first NFT. Unlike traditional NFT marketplaces, all of our creators can list and sell their NFTs on our platform entirely **free of cost**. NFTs are minted automatically by the winner of the auction and will be included in the price. This revolutionary move empowers our creators to go wild with their creativity.

Because our NFTs are minted upon final sale, they are protected by a watermark by default to protect the content until the NFT has successfully been sold, after which the watermark is removed.

As a creator, you can choose to stay completely anonymous as long as are able to verify that you the person in the content. Additionally, you won't even need any crypto-knowledge or an Ethereum wallet. If you wish, you can choose to convert your Ethereum into USD and get paid through PayPal or wire transfer.

## 2.4 Build Your Collection

If you're not interested in being a creator and just want to build an awesome collection, having an account is entirely optional. You can simply connect your wallet and starting bidding on the hottest NFTs right away. The NFTitties watermark is removed upon claiming your NFT to ensure that only you have the original photo.

## 2.5 Charity

Every minute, somewhere in the world, a woman dies from breast cancer. That's more than **1,400 women every day**. This number is way too high and we must support all attempts to rid the world of this disease. In honor of breasts in all shapes and sizes, **1% of all sales** will go to the Florida Breast Cancer Foundation (FBCF), a highly-rated Breast Cancer charity. These donations will be made on the first day of each month and are entirely transparent.

FBCF is a 4-Star Exceptionally-Rated Charity by Charity Navigator for demonstrating strong financial health and commitment to accountability and transparency. FBCF is the **#1** rated Charity Navigator breast cancer organization in Florida and the nation with a **perfect score** of 100% for Transparency and Accountability exceeding industry standards and outperforming others in its cause.

## 3. Token

Don't miss out on this unique opportunity and get in early by investing in our very own NFTitties token. Our token will be integrated directly into our marketplace with many bonuses, along with quarterly burn mechanisms.

### 3.1 Tokenomics

The NFTitties token is an unmintable ERC-20 token with a fixed total supply of 100,000,000.

### 3.2 Token Distribution

- **93%** Liquidity Pool / Ecosystem

These tokens are locked and will be used for centralized exchange listings, ecosystem incentives and are released over 2 years' time.

- **5%** Team

These tokens are locked and will be distributed to the team gradually over a span of 2 years.

- **3%** Marketing

These tokens are locked and will be used for creator bonuses and marketing purposes.

## 4. Disclaimer

This preliminary paper is for general information based on the NFTitties development process and experience. It should not be considered as professional financial investment advice and used in the evaluation of making any investment decision. Please follow the official website for the latest product updates.
